With thanks to our supporting partners:

Proudly produced by Oga

Welcome

The Sale

Arkle Angus is delighted to offer 65 bulls for sale in its fourth annual bull sale. The sale will take place at our selling facility at Bedford Harbour, near Munglinup.

The bulls being offered for sale include over 35 Paratrooper sons. Other sire lines in the sale include our first bulls by Banquet Quarter Pounder (VONQ252), Dunoon Prime Minister (BHRP758) and Millah Murrah Quixote (NMMQ96), as well as bulls by Spickler Powerpoint (USA18159093) and Millah Murrah Nugget (NMMN266) whose sons sold extremely well in last year's sale.

One of our most prolific donors WLHN38 Cherylton Grace has another two sons selling in this year's sale, as well as four bulls by another of our prolific donors, Cherylton Rosebud (WLHL45), and her daughters.

We look forward to seeing you at the sale. If you cannot make it in person, we will have a full library of photographs and video footage on our website as well as on AuctionsPlus. If you have any questions, feel free to reach out to Siobhan Cowan (Stud Principal) by phone or email.

Arkle Angus - News

The establishment of a large commercial cattle operation at Bedford Harbour as well as our own finishing property at Coronet Hill (Condingup) has been a major focus of 2023. We are currently running over 1,500 commercial breeders, with plans to build numbers substantially over the next five years.

To accelerate the growth of our commercial breeding herd, and ensure highest quality genetics, we are undertaking a large-scale embryo transfer program in our commercial herd. The best and most productive dams in the stud herd have been selected and matched with the finest sires to allow Arkle to build a high-quality breeding herd as the foundation of its commercial cattle operations herd.

Working with Richard Hall, we have implanted over 400 embryos this year and achieved a highly encouraging success rate.

Over the coming years, Arkle's ET program will have the added advantage of producing a large number of superior commercial bulls, to complement our stud bull offering, adding to our client service offering. We would also be pleased to talk to you about accessing the library of embryos being built up as part of Arkle's ET program.

We have finished and sold over 1,200 grass-fed steers and heifers on our Coronet Hill property over the past twelve months, many of which were purchased from supporters of Arkle Angus that had purchased bulls in previous years. With numbers building for 2024 and beyond, we look forward to seeing these purchases grow further - continuing our aim of building long term, mutually beneficial relationships with our stud bull buyers as we source the highest quality steers and heifers for finishing at Arkle Angus from them in the future.

Arkle Angus - Stud

We are excited to continue the development of the Arkle Angus stud, focusing on producing bulls that work for our stud and commercial bull buyers. As you might expect, we have a need to produce bulls for our own commercial herd, which will limit the numbers of bulls we can offer this year. We expect to see the number of bulls we can offer in our stud sale increase again in the coming years.

Working with our commercial operation, we look forward to generating more data on the performance of our stud breeding herd over the coming years - from birth to finishing and the final grass-fed Angus beef product. This data will be incorporated into our future breeding decisions, further benefitting our stud and commercial producers. It will also provide confidence for our stud and commercial producers about the genetics they are purchasing from Arkle Angus.

Our leading sire, Millah Murrah Paratrooper P15, continues to set the standard in angus genetics across Australia. We are excited to sell the first bulls out of our Paratrooper daughters in this year's sale, which have proven themselves to be exceptional cows (we now have four generations of them on farm). A large proportion of our donor cows for both stud and commercial embryos are Paratrooper daughters. With exceptional temperaments, the Paratrooper daughters are soft and maternal, with excellent udders. They represent some of the most outstanding cows phenotypically within the herd.

2023 saw the first calves produced by Milwillah Jaal R138 and Alpine 38 Special SO21, in both cases from semen used extensively across our heifer AI program. I can confidently say that both bulls work well in a heifer program, we had no complications calving and the calves are slender and sprightly at birth and have demonstrated excellent growth rates. Both bulls have matured beautifully, with impeccable feet and structure. We look forward to weaning the first of these calves in the coming months, with a selection of Alpine 38 Special SO21 and Milwillah Jaal R138 sons being offered in our 2025 sale.

We finished 2022 with the purchase of three new donor cows from Coonamble Angus. The cows are complete outcrosses for Arkle Angus and were selected for their deep pedigrees proven over many years. We have had great success blending Coonamble genetics into the stud. All three cows have joined our donor program and produced large numbers of embryos for the stud ET program. We are excited to see their first calves on the ground in 2024. Photos of all three cows can be seen on our donor photo page and photos and videos can be seen on our website.

Acknowledgements

The work that goes into the bull sale and producing the bulls that you see in this catalogue is huge and it would not have been possible without the assistance and guidance of our entire team and external advisers. We would particularly like to thank:

Peter May, Norman Stopforth & Paloma Muniz, Richard Hall - Golden Arm Genetics, Enoch Bergman, David Swan and Reuben Welke, Swans Veterinary Service, Bob Pumphrey, Darren Chatley and the team - Nutrien.

For those able to join us at the sale, we look forward to meeting you on February 9th. Refreshments and lunch will be provided on the day, both before and after the auction.

Warm regards,

Siobhan Cowan (Stud Principal) and the Arkle Angus Team

Sale Information

Sale Date The Arkle Angus on-farm sale will commence at 12 pm on Friday, 9th of February 2024. The bulls will be penned for pre-sale inspection at 10 am on the day of the sale at our Bedford Harbour farm. Should prospective purchasers wish to inspect the bulls prior to the sale day, please contact Siobhan Cowan (0438709940) or Peter May (0428766003).

Sale Day Visitation and Inspection Protocols COVID 19 rules will be observed at the sale venue. Attendees are required to check in via this QR Code or in writing. We ask all visitors to observe social distancing rules and use the freely available hand sanitiser.

Auction System The sale is being conducted by Nutrien. It will be conducted under normal auction conditions and responsibility for the bull transfers to the purchaser at the fall of the hammer. Please complete a registration card and obtain a buyer's card from the selling agents if you are intending to purchase a bull on the day. All animals are sold exclusive of GST.

Auctions Plus The Arkle Angus sale will be live streamed by Auctions Plus. Auctions Plus is an alternate bidding option if you can't attend the sale in person. It is, however, only available to registered users. We recommend registering online at least 24 hours prior to the sale. Photos and videos of all bulls and females will be available on Auctions Plus and our website www.arkleangus.com prior to and on the day of the sale.

Phone Bidding We have full mobile phone coverage at the sale. If you intend to purchase over the phone, please contact the selling agents to reserve a line. Other phone numbers on the day – Siobhan Cowan (0438709940) and Peter May (0428766003).

Rebates To thank outside agents for their support at the sale, a 3% rebate will be available to all outside agents registering bull buyers, in writing, PRIOR to the sale and settling on their behalf withing seven days of the date of the invoice.

Registration Purchasers wishing to register a bull or female with Angus Australia will need to inform Arkle Angus and provide the necessary details. Arkle Angus will facilitate this process on your behalf. Buyer instruction forms will be available on the day. Please be sure to provide: a PIC number, Angus herd ID (if applicable) and specify if the purchasing herd is EU accredited.

Catering To welcome all our buyers and partners, a complimentary lunch and other catering will be provided on the day.

Health Status All bulls on offer have had the following procedures undertaken to ensure the highest standard of health:-

1. Bulls are semen tested by Swans Veterinary Services to ensure they are fertile and fit for service;
2. All bulls are double vaccinated with Pestiguard;
3. All bulls are double vaccinated against IBR;
4. All bulls are double vaccinated with 7 in 1;

5. All bulls are double vaccinated with Vibrovax;
6. All bulls are drenched with a fully affective anthelmintic;
7. All animals are tested for Pestivirus to ensure no persistently infected (PI) cattle exist.
8. Our herd health is J-BAS 8, the highest level available.

Semen Rights All bulls are sold with 80% semen marketing rights attached. In doing this, we leave the majority of any potential semen sales for the buyer. However, by keeping 20%, Arkle Angus as the breeder and party with the greatest knowledge of the bull's background, retains a seat at the table in any possible negotiations with semen marketing and other parties. By retaining an ownership interest in the semen marketing rights, Arkle Angus would hope to offer purchasers the opportunity to maximise semen sales on the top sires in the sale.

Arkle Angus Guarantee Every bull is guaranteed by Arkle Angus to be fertile and capable of natural service at the time of sale and for a period of twelve months following the sale. Should a bull prove to be infertile or unable to serve cows naturally (provided it is not caused by accident, injury or disease contracted post sale), the purchase will be refunded the purchase price of the bull less salvage value upon a written report of cause by an independent, practicing veterinarian. Should a suitable replacement be available at the time, Arkle angus will endeavour to provide a replacement bull if preferable.

Temperament While Arkle Angus takes great care to ensure it only offers bulls with excellent temperament, we acknowledge that the sale ring is an unfamiliar environment for them. Please take care if handling the bulls prior to sale and do so at your own risk.

Insurance We highly recommend taking out insurance on any bulls or females purchased at the sale.

Health and Safety of Visitors to the Arkle Angus Sale All sale bulls have been screened for temperament and are quiet to handle under normal circumstances. There are, however, inherent risks associated with cattle handling.

VISITORS ENTER THE CATTLE PENS AT THEIR OWN RISK. CHILDREN MUST NOT ENTER THE CATTLE PENS.

People entering cattle pens are at risk of injury. We do not expect the bulls and females to be aggressive with humans, but sale day places extraordinary pressure on them as they experience a foreign environment. Do not crowd the bulls or females and do not loiter inside the pens. Please call upon any of the Nutrien or Elders agents for an escort through the bulls and females, if required. Please vacate each pen as soon as possible to reduce social contact.

ANGUS**

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select “**Sign Up**” in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select “**Dashboard**” and then select “**Request Approval to Buy**”.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

DONOR COWS

WLHM66 - the best of the Hector daughters in the stud herd in my opinion. She is out of Millah Murrah flower E172

WDC21S33 with her calf ARK23U1 - our pick of the Coonamble Autumn drop heifers. She has grown out extremely well and is an exciting outcross for the Arkle stud. Her heifer calf is by Coonamble Samson S54.

WLHN152 and ARK23U259 - Another beautiful Hector daughter and out of one of the most tried and tested donors in the stud WDCE72. Her heifer calf by Milwillah Jaal R138.

WDCL283 - Top priced cow purchased in the Coonamble 2022 female sale.

ARKR37 - A paratrooper daughter out of an investment dam

WDCL105 - A beautiful Elevator daughter purchased in the Coonamble 2022 Female sale

ARKR9 - Arkle Eva a Paratrooper out of a Klooney daughter.

ARK21S27 with her calf ARK23U37 - A first calving Paratrooper daughter out of an investment dam. Heifer calf by Banquet Quarter Pounder Q252.

Coonamble E72 (WDCE72).

www.arkleangus.com
